

ADCAR

Aviation Data Consolidation And Reporting

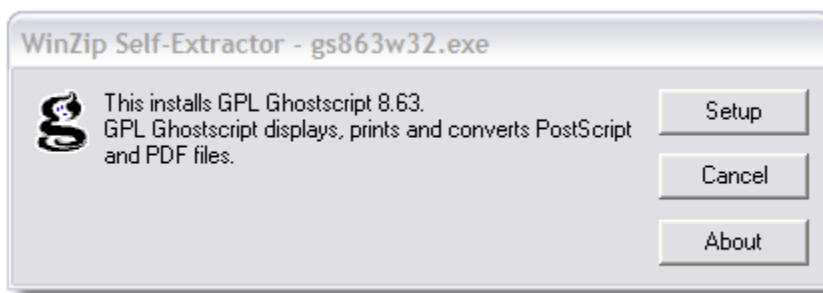

Installing ADCAR and the Demo Database

Install the ADCAR program:

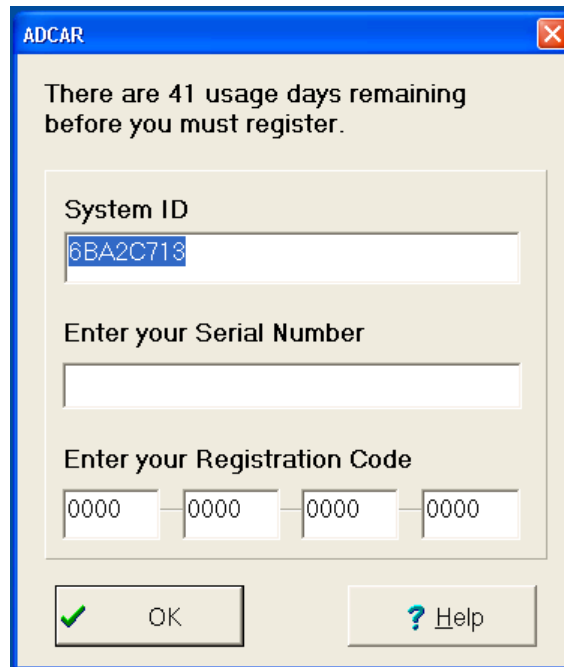

- Download the ADCAR program to your desktop or a folder on your computer.
- Double click the file to begin the install procedure.
- You will get a security warning message. Click Run.

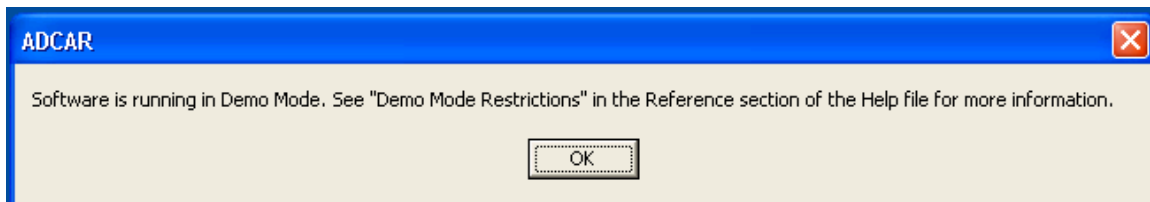

- When install is complete, double click on the ADCAR icon to start the program. You may get a message that the program wants to install Ghostscript. This application is necessary to view thumbnails in the documents section of ADCAR. Follow the directions to install Ghostscript.

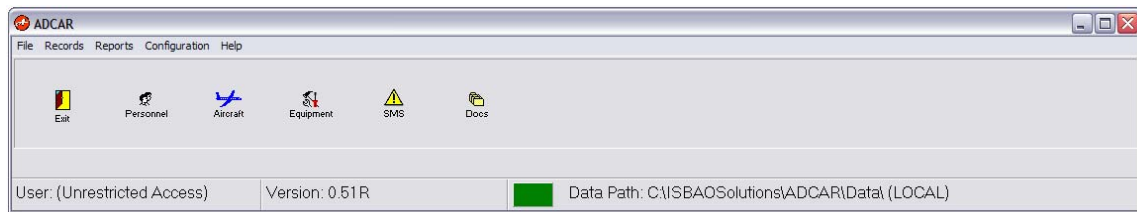

- You will see a window asking for a Serial number and Registration Code. Do not enter anything. Click OK.

- The Demo Mode Restriction window will come up next. Click OK.

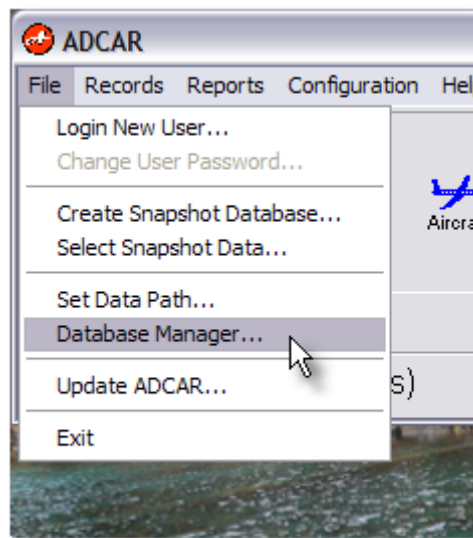

- ADCAR will open to the main menu.

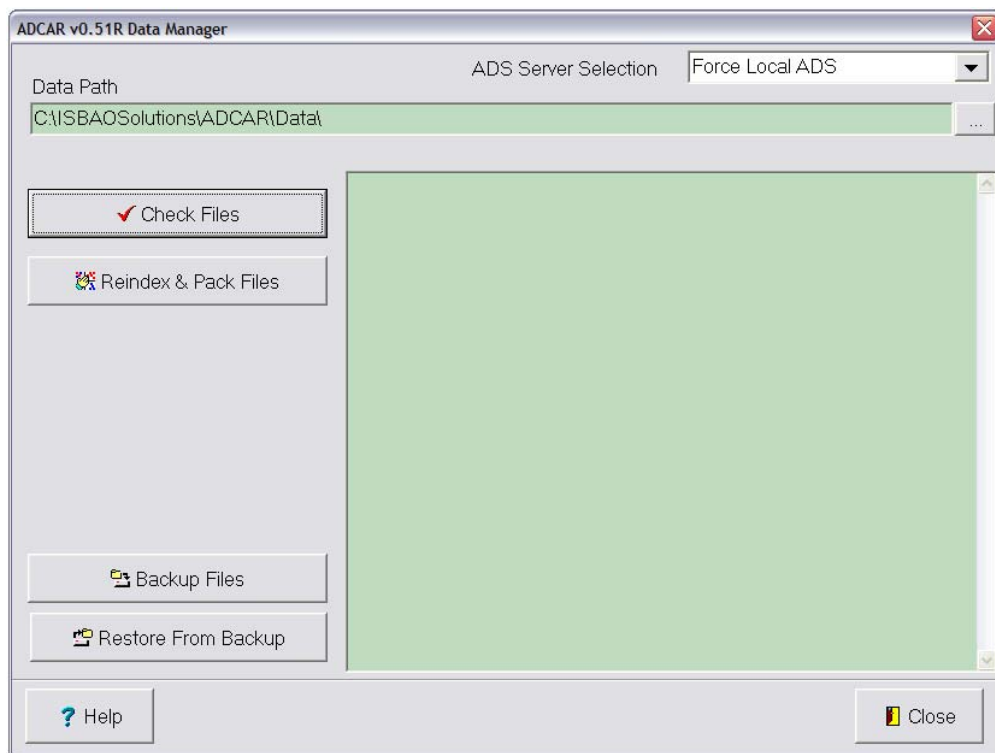

Install Demo Data

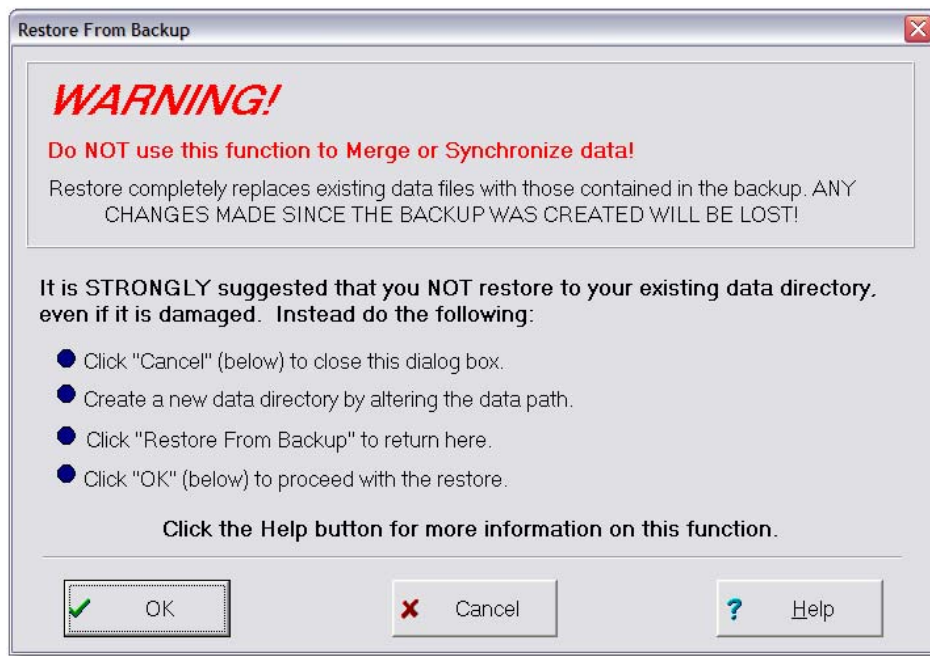

- Download the Demo Data file to your desktop or a folder on your computer.
- Select File>Database Manager from the command bar of the Main Menu.

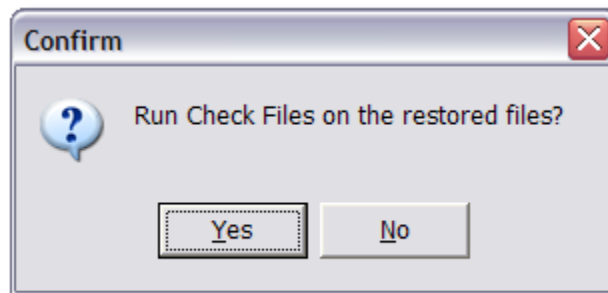

- Click on Restore From Backup. If you want to create a new directory for the Demo Data, change the Data Path.

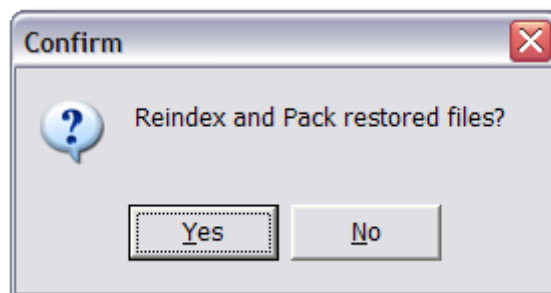

- You will receive a warning message, Click OK.

- Select the location of the Demo Data file, select the file and click open. The database will load and you will get two more messages:

- Click YES.

- Click YES.
- Close the Data Manager.
